DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 6, 7 (and thus 8 by dependency), 11 (and thus 12 by dependency), 20, and 21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 6 recites the limitation "the pill" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claims 7 (in line 2), 11 (in line 2), 20 (in line 5), and 21 (in line 2) all describe the pillbox cover as "rotatably attached to the pillbox". This is confusing, a more appropriate word being "pivotally". Rotation is specific to movement about an axis that is within the body. The cover moves about an axis that is at its edge. This movement is known as "pivoting" and sometimes "revolving", and the description of the mounting state of the cover should correspond to these definitions.

Allowable Subject Matter

Claims 1-5, 9, 10, and 13-19 allowed.

Several references have been retrieved disclosing a removable bottom wall for a lattice-work comprising body for dispensing. However, none of these – namely, US

patents 6,457,611, 6,581,356, 3,820,655, and 6,021,623 – teach the top surface of the removable bottom having a loader form displaying a pattern defining dosage indicator spaces.

Others, such as US 5,791,478, 4,593,819, 2,448,918, teach a removable plate with a form pattern indicating dosage indicator spaces. However, in any interpretation of these references, the placement of the removable plate up against the latticework to achieve the phenomenon of the indicator spaces appearing in the bottom portion of each loader container results in the containers not having an open top end to permit pills to be placed therein.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
